

TUBING & PACKAGING Netting

SW Series Standard-Duty Tubular Sleeve-Web® Netting

Standard-Duty Sleeve-Web provides low-cost protection against physical damage to exterior surfaces of machined, polished, plated, coated or threaded cylindrical parts. Its elasticity ensures a snug fit and a nonslip grip on straight-sided parts and those with tapered or varying contours. Web thickness is approximately .070" (1.78 mm).

SW Series Light-Duty Tubular Sleeve-Web® Netting

Light-Duty Sleeve-Web provides light-duty protection. Ideal for irregular-shaped parts, it stretches easily to twice its diameter, while its elastic properties allow it to pull tightly around the smaller sections. Provides inexpensive, attractive, easily applied wrapping for long, narrow items such as wires, glass rods, tubing and rolled paper. Web thickness is approximately .060" (1.52 mm).

SW Series Heavy-Duty Tubular Sleeve-Web® Netting

Heavy-Duty Sleeve-Web has a thicker extrusion, more strands, and closer spacing. It offers an extra measure of protection for valuable precision components like heavy-duty truck parts, screw cylinders, spline shafts, couplings, roller bearing assemblies, pistons and heavy-threaded fittings. Eliminates the high cost and time-consuming labor associated with traditional protective wrappings like paper, cardboard, styrofoam or wood. Web thickness is approximately .080" (2.03 mm).

Netting (cont.)

PMW Series Flat Sheet Netting

Flexible Series PMW Net Sheetting provides excellent protection from impact or abrasion damage. Use as a separator for stacked parts during storage, handling and shipment, or as protective wrap for bulky items. Unlike wood, styrofoam or cardboard, it will not deteriorate in contact with solvents, coatings, slushing oils or rust-inhibitors.

CBW Series Cut Bottle-Web Netting

Series CBW is a tough yet flexible netting that provides surface and impact protection for bottles of any size and shape. Since the netting is extruded rather than woven, the strands will not separate, weaken or spread unevenly. The diamond mesh design allows for production in a wide range of strengths, stretch capabilities and elasticity to satisfy all types of protection needs.
